Part 3 - Written Stylistic Analysis

1. He is fairer than the morning star, and whiter than the moon. For his body I would give my soul, and for his love I would surrender heaven. The real lover is the man who can thrill you by kissing your forehead or smiling into your eyes or just staring into space.

   - Chatbot's analyses
     - Informal, personal
     - Education, concern with precision
     - Personal, social
   - I agree that it's informal and Personal but when it comes to Education I'm thinking there is no part on which you are getting educated. So, I don't agree with the education part of the answer and its requirements.

2. Secondly, this passage will clarify how nuclear power plant delivered radioactive disposal waste and that is a gigantic issue for the United States and nations around the globe. It has been a major issue for every nation in the world that where to store radioactive transfer waste and how to keep that squander. Countries like the United States is unable to figure out where to store disposal waste.

   - Chatbot's analyses
     - Verbal fluency, cognitive complexity
     - Use of concrete nouns, interest in objects/things
     - Education, concern with precision

- ○ I agree with all the three analyses that chatbot made because these sentences are about nuclear creation and the power plant which I took it from. So, verbal fluency makes sense because it's easy and that will improve verbal fluency. Use of concrete nouns makes sense because I'm interested in the topic and also education makes sense too because it's based on education.
3. It will rain tomorrow. I'll do the washing-up. He'll carry your bag for you. I'll pay for the tickets by credit card.
   - ○ Chatbot's analyses
     - ■ Informal, personal
     - ■ Personal, social
     - ■ Future and goal-oriented
   - ○ I agree with all the three analyses that are given by the chatbot because the sentences that I used are in future tense and also talks about the credit card information and it's informal so that makes sense too.
4. Widely and several months description
   - ○ I think we can make this chatbot more precise and add more components to it. So, the chatbot will make analyses to the sentence and will give more near precision to the sentence. To make it more precise we can add more checks to the sentence and the tone of the sentence, if the person is writing based on anger or happy moment or the regular lifestyle. We can also add a feature to the chatbot that checks if the sentences are related to the thing that person wanted to talk about.
